

bibliotheca
UHF product range

An experience designed for library users

We are proud to offer our new Ultra High Frequency (UHF) product line, which delivers the same easy-to-use and enjoyable experience library users and staff around the world have come to expect from bibliotheca. We combined the most innovative chip technology available with refined algorithms that accurately account for library specific workflows in our UHF product line. The bibliotheca UHF experience is designed around library users' natural behaviors and expectations, resulting in high first-time user success.

We develop solutions that are easy for people to use and enhance the overall library experience. Creating natural workflows that encourage continued use is not easy. With our innovative UHF solutions, libraries can trust that users will find the experience natural, intuitive and empowering. By listening to customers and employing rigorous research, bibliotheca has created UHF solutions that truly add value to the overall library experience.

connect

engage

evolve

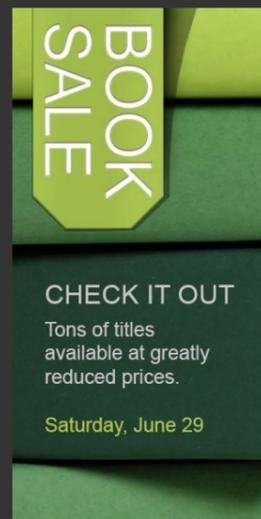

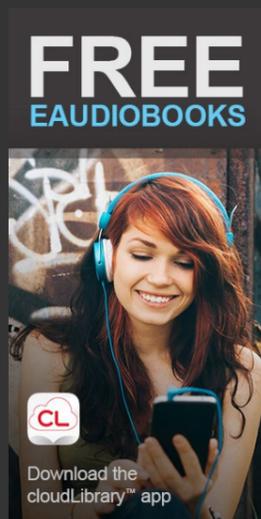

Streamlined user experience

Through our intuitive software design and hardware configuration, our solutions deliver a consistent experience for both library users and staff, creating interactions they can trust and rely on.

self-service is only convenient if it's easy

Our intuitive self-service software has been designed from the ground up, specifically for library users. quickConnect delivers an engaging experience for users of all ages and abilities – making borrowing and returning library items a breeze.

promote your value-added services

Make a lasting impression on users and ensure they know about all your library has to offer. With an ever-growing set of catchy templates to choose from, we ensure that you can easily edit and create visually appealing promotions in minutes.

drive attendance to your programs

quickConnect allows you to promote your library's programs and services on the self-service home screen, helping you build awareness of all your educational opportunities and drive more traffic to programs and events.

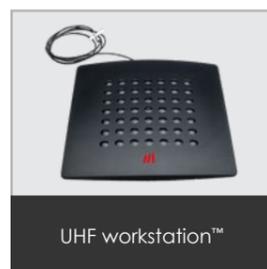

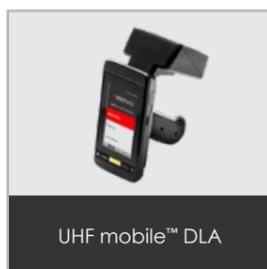

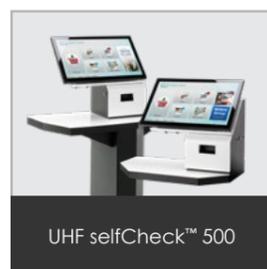

offer digital titles at the selfCheck

quickConnect and cloudLibrary deliver your entire digital collection to users right at the selfCheck™. Suggested reads are presented in a clear and unobtrusive way, allowing eBooks and eAudiobooks to be immediately added to the user's digital shelf.

Trusted and reliable solutions

Allow staff to focus on more value add services within the library, knowing they can rely on our trusted solutions to work as promised. We develop quality products that will provide maximum long-term value and easy support. While our UHF solutions are new to the market, these solutions have been designed and tested to reduce down time and minimize inconvenience to patrons and staff. Trust that your collection is secure with the combination of our high performing UHF tags and UHF gate.

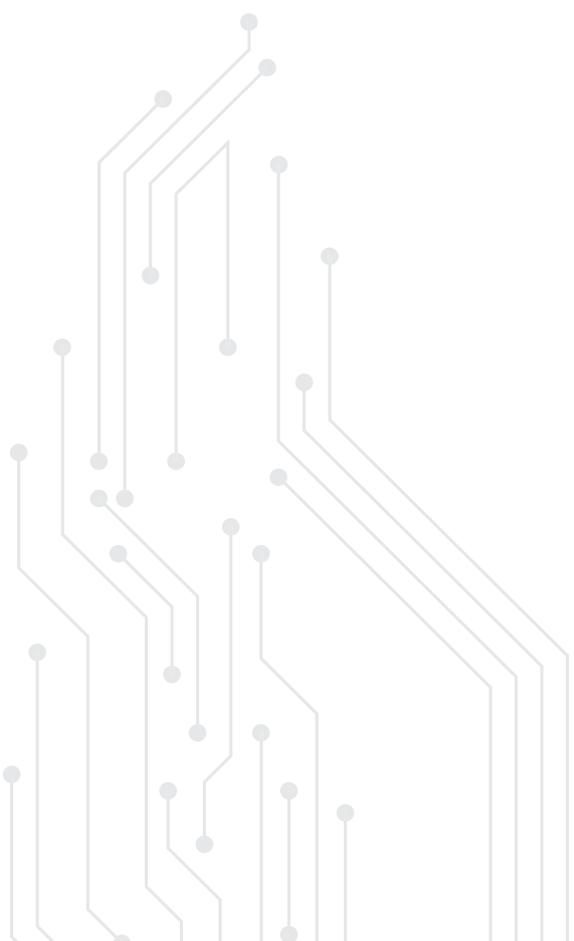

A precise reading range that maximizes library space

By using a precise read area with UHF technology, bibliotheca solutions reduce space requirements, allowing you to install selfChecks closer together in tight spaces, which is not common with other traditional UHF library solutions.

Aesthetic design for modern library spaces

The bibliotheca UHF range has been designed to be modern, sleek and easy to use for both library users and staff. Our staff and security solutions complement the library environment, while the selfCheck range encourages self-service usage with a well-designed, engaging experience. We've been able to achieve attractive selfCheck designs that are not impacted by the requirements of UHF technology.
