Introduce digital content to all library users
cloudLibrary content module

The cloudLibrary content module, our eBook and eAudio solution, is designed specifically to meet the evolving needs of public libraries. With tools to increase awareness of library programs, cloudLibrary content does much more than circulate digital content.
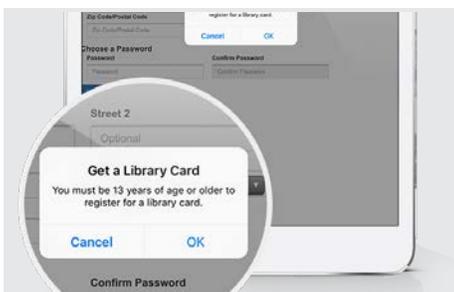

Drive circulation + reduce hold times with a digital express collection

**Promote your digital collection outside the library**

Offer more titles and selection with pay-per-download

Allow new users to sign up through the app

Deliver digital collections to selfCheck users with intuitive integration

Drive discovery with in-app reading recommendations by NoveList

amazon fire   Available on the App Store   GET IT ON Google Play   available in the chrome web store   Available on Windows   Available on Mac OS   nook apps

cloudLibrary cloudLink
digital sharing done right

With cloudLink, libraries can maximize the impact of their digital collection budget by sharing titles, while still prioritizing the needs of their individual users. Developed by librarians for library users, cloudLink allows libraries to build and manage multiple private eBook and eAudiobook collections with ease and flexibility, controlling restricted and shared titles and prioritizing their materials for their users while sharing unused items easily. Even better, users have seamless access to all local and shared titles through just one app – no multiple log-ins required!

A new cloudLink group can be created by as few as two libraries within the same state or province. Alternately, libraries can join an existing cloudLink group at any time, regardless of their membership in any consortium. The unique nature of cloudLink ensures that all libraries, both small and large, benefit from their partnership. After joining a cloudLink group, all users gain access to hundreds or thousands of new titles, driving digital circulation and increasing the breadth and size of all participating libraries' collections.
