

ECO-VISIO

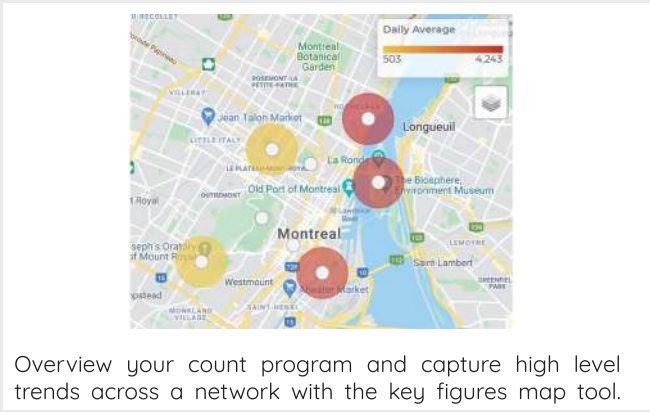

All of your count data, immediately available.

Analyze your count data like never before with Eco-Visio 5, Eco-Counter's latest online data analysis platform.

- + No data analysis skills required
- + Your preferred data analyses immediately accessible
- + Available on a smartphone, tablet and computer
- + Dozens of customizable widgets for dynamic data visualization
- + Easily share data, dashboards and reports with partners

Capture trends, faster

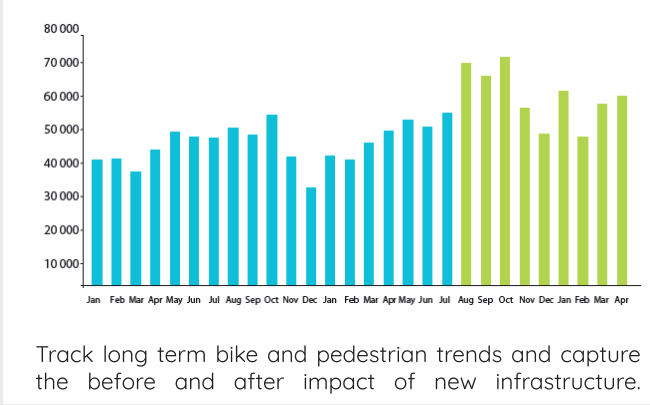

Average Day - Weekday

Daily Average

2,427 **+16.7%**

Automatically see a snapshot of the latest counts trends each time you login.

From everyday analyses to professional data tools, one platform to get the most out of your data

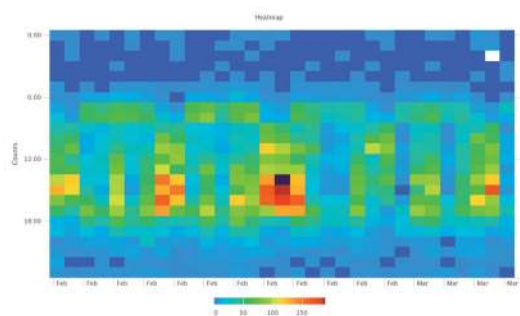

Customized count anomaly alerts

Eco-Alerts permits users to enter a few, simple parameters that create a range of expected daily counts for each counting system.

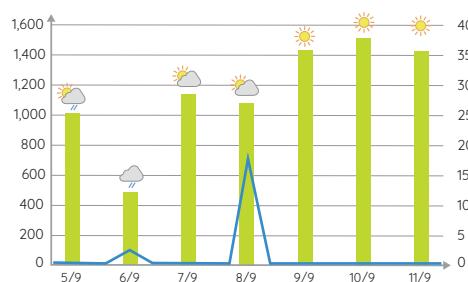

Share reports and data with partners

With just a few clicks, download a PDF overview report of your count data, ready to be shared with engaged stakeholders.

Visualize volume trends with the heatmap tool

The new Eco-Visio heatmap tool allows you to quickly capture high and low peak trends in your bike and pedestrian data.

Quickly capture the impact of weather

The weather module offers precise, counter-specific meteorological data, including a wide variety of indicators.

Two licenses to suit your needs
